GENERALS

- **Programming languages:** JavaScript, TypeScript, Golang.
- **Libraries:** ReactJS, TailwindCSS, Mantine UI, ShadcnUI.
- **Frameworks:** NextJS, RemixJS, ExpressJS, Tanstack, React Native.
- **Tools:** Git, Vercel, Cloudflare, Figma, Firebase, Supabase, Jira.
- **Languages:** Vietnamese, English.

EXPERIENCE

MOR SOFTWARE **FRONTEND DEVELOPER** **Vietnam**

Apr. 2025 -Feb. 2026

- Engineered the L1F3, SUNPOP application in React and React Native, converting Figma designs into fully responsive, production-ready interfaces across web and mobile platforms.
- Architected and maintained a shared library of reusable UI components, reducing duplication and ensuring design consistency across the codebase.
- Partnered with backend engineers to integrate REST APIs, triage bugs, and ship features within sprint deadlines in an Agile environment.
- Participated in weekly code reviews, improving team code quality and adhering to established engineering standards.

PROJECTS

SANGXANH **FULL STACK DEVELOPER** **Vietnam**

May. 2025 - Feb. 2026

- Developed a content-rich lighting e-commerce platform using Next.js SSR, improving initial page load speed and search-engine discoverability for a catalog of 500+ product SKUs.
- Built a high-performance RESTful API in Golang, handling product listings, inventory filtering, and order management with low-latency response times under concurrent load.
- Delivered a custom admin dashboard with Vite.js that empowered non-technical staff to manage all site content independently.
- Containerised the entire application stack with Docker & Docker Compose, enabling consistent environments across development and production and simplifying onboarding for new contributors.
- Implemented an automated CI/CD pipeline that runs linting, builds Docker images, and deploys to the cloud server (GCP) on every push to main — reducing manual deployment steps to zero.

APATEK **PM/FULL STACK DEVELOPER** **Vietnam**

Aug. 2024 - Oct. 2024

- Led development of a responsive company showcase web app using Next.js, TailwindCSS, Prisma, and PostgreSQL deployed on Vercel.
- Optimised Core Web Vitals and cross-device responsiveness, improving overall user experience and reducing bounce rates.
- Live site: apatek.com.vn

DMB INDUSTRIAL **PM/FULL STACK DEVELOPER** **Vietnam**

Aug. 2024 - Oct. 2024

- Led development of a responsive company showcase web app (dmb.com.vn) using Next.js, TailwindCSS, Express.js, and PostgreSQL deployed on Vercel.
- Optimised Core Web Vitals and cross-device responsiveness, improving overall user experience and reducing bounce rates.
- Built and maintained backend services for dynamic content management, enabling the client to update product listings without developer intervention.
- Live site: dmb.com.vn

AWARDS

CODEFEST 2024 - THIRD PRIZE *Sep. 2024*

- Led a 4-member team in CodeFest, a competitive programming and robotics challenge focused on autonomous bot navigation, opponent detection, and strategic eliminations; achieved 3rd place overall.
- Facebook Post
- Facebook Post

NINJASHIN 2024 - SECOND PRIZE *Oct. 2024*

- **Product demo:** Formill
- Apply AI to implement a product that enhances the study experience.

CERTIFICATES

JAVASCRIPT ALGORITHMS AND DATA STRUCTURE *Feb. 2025*

- FreeCodeCamp
- Link: Javascript algorithms and data structure Certificate

PROJECT MANAGEMENT PRINCIPLES AND PRACTICES SPECIALIZATION *Feb. 2025*

- University of Michigan
- Link: Cert

EDUCATION

FPT UNIVERSITY **SOFTWARE ENGINEER** **Hanoi, Vietnam**

- Major: Software Engineering • 70% Scholarship • GPA: 3.2

Sep. 2022 - Now
